

# Fireplace Surrounds

Fireplace Surrounds by Chemcrest include a mantle and apron as well as pilasters to enhance any authentic or gas fireplace. All of the components of a Chemcrest Fireplace Surround may be modified in our Factory to ensure a perfect fit for your fireplace project. Please specify exact dimensions and ask for quotation. Polyurethane is an excellent material to use around a fireplace when installed properly as it is not effected by the heat. Another option for fireplace surrounds is to combine one of the pilasters shown here with a Custom Size Mantle as shown in the Decorative Exterior Products Catalogue Module available from Chemcrest - ask us for details.

## FP5348 • Fireplace Surround

### FP5348-C • Fireplace Surround (4 pc)

Width 53 $\frac{1}{4}$ " I.D.
